conservancy (2.3km, 1-2 hours, easy rating)

Notes for Walkers

- Please carry sufficient water. 2-3 litres per person is recommended.
- No open fires permitted in the sanctuary .
- Please walk on the trail you have booked.
- Please take all rubbish with you including food scraps, there are no bins available.
- Composting Toilets are available near the Avon Rd entrance.
- Picnic tables are provided along the trail for your enjoyment.
- Please stay on the trail at all times as many of the areas are very fragile.

Contact Info

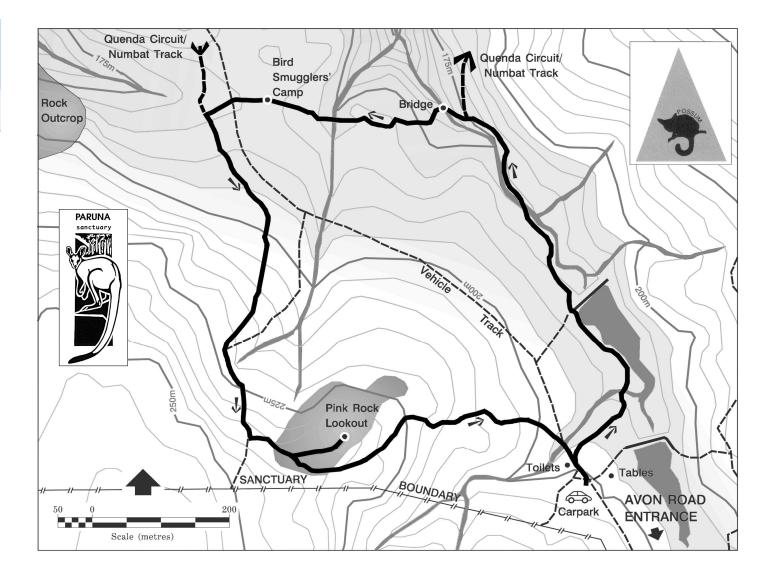

Emergency Services:	000
Booking Office:	9572 3169
Managers Residence:	9572 9078

The nearest help is the Managers residence 1km down Ewing Rd on the right.

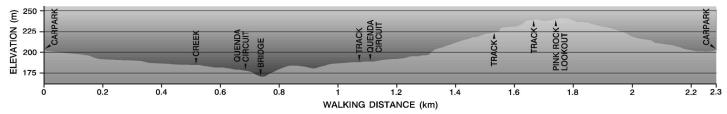

Please note that mobile phones only work from the highest points of Paruna and then only intermittently.

Trail Information

The Possum Loop is an easy 2.3km one way circuit taking in the highlights of Paruna. With creeks, views, birds and spectacular spring wildlflowers this trail is a delightful afternoon outing. The trail is marked with beige markers depicting a possum at turns and junctions. Distances in km are marked in brackets in the trail notes.

unga and Avon Valley National Parks. It has become a safe haven for many of our rare and threatened mammals such as Quenda, Woylie, Tammar Wallaby and Black-footed Rock Wallaby which were reintroduced during 2000-01. A 17km electric fence extends along the southern boundary to help control vermin such as foxes, cats and rabbits.

Enter at the Avon Road gate and follow the short path to the start of the trail, located to the right of the vehicle track. Toilets are located straight down the vehicle track to the left.

The pretty white trees surrounding the car park and trail are Powderbark (*Eucalyptus accedens*) & Wandoo (*Eucalyptus wandoo*). The two species can be difficult to separate but Powderbark has a fine powder on the bark which turns salmon pink when freshly shed.

(0.1) The vegetation opens out along a sandy trail. Picnic tables are located along the dam to the right. Look for the Rufous Treecreeper, a bird that has just about disappeared from the Perth region. This reddish-brown bird is often sighted perching or spiralling up the side of a tree and has a distinctive piercing call. It occasionally visits the picnic tables.

Devils Pins (*Hovea pungens*) is a spectacular purple pea common in this open area in late winter. The sandy soil is also a good area to look out for diggings which might be from the re-introduced Woylie or the Quenda foraging at night for food. One of the sundews (*Drosera erythrohiza*) appear in the sandy soil after rain. These carnivorous plants have red or green rosette leaves. They are covered by a sticky coating that traps small insects which are digested by the plant to gain important nutrients.

A boardwalk runs along a granite outcrop to protect this fragile habitat.

(0.3) The trail meanders along a creek, an excellent spot to listen for frogs during the wetter months. Glauertøs Froglet which sounds like a pea in a can and occasional calls from the Quacking Frog can be heard.

The vegetation returns to trees again with excellent Spring wildflowers especially the widespread yellow feather-flower *Verticordia acerosa*. An excellent area to see birds as they feed on nectar as well as insects attracted to the flowers. Look out for the Splendid Wren with its brilliant blue plumage or listen for the Western Gerygone that has a melodious, persistent and somewhat mournful call.

(0.7) The trail forks with the Possum Loop continuing down the slope to a bridge over the creek where there is a good view of the Avon River Valley.

Walking up past the bridge, there are a number of interesting plants including *Xanthorrhoea acan-thostachya*, a rare grasstree distinguished by the distinct separation of the brown skirt from the green crown.

(1.02) There is an old bird smugglers camp thought to have ceased operation 20-30 years ago. Examples of cages, feeding trays, incubators, watering systems and even what appears to be an old gassing chamber can be seen in the area. This illegal practice attracts high penalty rates. Up to 90% of birds usually die in the smuggling operation.

(1.07) Just past a vehicle track is an enormous Christmas Tree (*Nuytsia floribunda*), which around December becomes a blaze of orange. It is a parasitic plant relying on surrounding trees for water and nutrients.

(1.11) The track turns left as it rejoins the Quenda Circuit. Reach a stand of Zamia (*Macrozamia reidlei*) an ancient gondwanan relict that have a separate male and female plants. The bright red seeds on the female plant are highly toxic. The Aborigines have a special preparation technique making the seeds an important food source.

A controlled burn was conducted in this area in Spring 2004 with the invaluable assistance from local bush fire brigades.

(1.37) The trail becomes steep and gravelly as it enters another stand of Powderbark and Wandoo.

The trail follows a vehicle track for a short distance then turns off to a massive granite outcrop called õPink Rockö named after the pink feather-flower *Verticordia plumosa* that flowers in late spring. Follow the boardwalk (1.74) in this fragile area to the viewing platform for a well earned rest and a spectacular view. The Avon River can be seen in the centre with the Brockman River valley to the North.

(2.08) The trail follows the vermin-proof fence for a short distance to another stand of Powerbark, Wandoo and Spring wildflowers. Look for the Yellow Buttercups, (*Hibbertia* sp.), there are several species throughout Paruna. Along this section there is also the Bearded Heath (*Leucopogon polymorphus*) which has tiny white furry flowers. The beautiful White Myrtle (*Hypocalymma angustifolium*) is also common in this section in early spring.

Late in spring the Rainbow Bee-eater migrates to the south and is often seen at Paruna through Spring and Summer. Walkers may be lucky to see them emerge from their nests constructed in tunnels on the slopes.

(2.28) The trail soon reaches the end, near the Avon Road gate.

AWC would like to thank-you for visiting one of our special sanctuaries. Paruna was chosen as a safe haven for wildlife because of its location between two national parks and the incredible diversity of habitats within the boundaries. We hope you enjoyed some of the natural beauties of Paruna. If you would like further information on the AWC including helping our threatened species, please take a newsletter or contact our booking office on 9572 3169.

Please recycle your trail notes by returning them to the box by the gate. Thankyou.
